

Project Update 2

1. Project title

Student-Friendly Schedule of Classes

2. Team members and roles

Ady Weng | Project Manager | ady.weng@gmail.com

Michael Pulley | Analyst | mjpulley@terpmail.umd.edu

Tristan Clark | Researcher | tristansclark@gmail.com

Lorenzo Regala | Tester | enzo.regala4@gmail.com

Andrew Birgin | Researcher | acbirgin@yahoo.com

3. Accomplishments since last report

- Ady Weng:
 - Updating the README file.
 - Assisted coding the sort_courses and save_courses functions.
 - Managed documentation and Github organization aspects.
 - Helped write the relevant documentation in-line/block comments on the program's abstraction.
- Michael Pulley:
 - Developed the while-loop method for running the program continuously (through multiple functions calls) until it is manually quit.
 - Subsequently edited the flowcharts to reflect these algorithmic developments.
 - Assisted coding the sort_courses function and save_courses functions.
- Tristan Clark:
 - Compiled the relevant data from PlanetTerp into the CSV file. Not entirely finished, but has made progress agreed upon by the group.
 - Wrote relevant documentation comments on the program itself.
- Lorenzo Regala:
 - Tested code for all three completed functions for bugs and reiterated fixes.
 - Researched try-catch functions to implement for faulty inputs.
 - Assisted with coding the sort_courses and save_courses functions.
- Andrew Birgin:
 - Compiled the relevant data from PlanetTerp into the CSV file. Not entirely finished, but has made progress agreed upon by the group.
 - Wrote relevant documentation comments on the program itself.

4. Roadblocks, problems, challenges, risks, questions

- Looking to implement the try-catch functions so the program does not break when its subject to syntactical input errors.

5. Plan for the next sprint (i.e, until the next deliverable)

- Ady Weng:
 - Continue to update the README file. | **Ongoing**
 - Manage documentation and Github organization aspects. | **Ongoing**
 - Assist implementing try-catch to the program's inputs. | **December 6**
- Michael Pulley:
 - Edit flowcharts with the try-catch loops. | **December 6**
 - Manage documentation and Github organization aspects. | **Ongoing**
- Tristan Clark:
 - Finish compiling the relevant data from different sites (mostly PlanetTerp) into a CSV file. | **December 6**
- Lorenzo Regala:
 - Test code with various inputs for bug fixes. | **Ongoing**
 - Assist implementing try-catch to the program's inputs. | **December 6**
- Andrew Birgin:
 - Finish compiling the relevant data from different sites (mostly PlanetTerp) into a CSV file. | **December 6**
